

**Thomas J. Louie, MD, FRCPC**

Professor Emeritus  
Department of Medicine and  
Department of Microbiology, Immunology and Infectious Diseases  
University of Calgary  
Calgary, Canada

.....

Dr. Thomas J. Louie, MD is a Professor of Medicine, Department of Medicine and Microbiology-Infectious Diseases, University of Calgary, Calgary, Alberta, Canada and Medical Director for the infection prevention and control program in the Calgary Health Region. He is involved in clinical trials of new antimicrobial agents and biologic response modifiers in seriously ill patients with infections, as well as selected aspects of clinical infectious diseases and clinical microbiology as it applies to antimicrobial utilization of home IV and diagnostic tests. Dr. Louie is also interested and knowledgeable about the application of fecal microbiota transplantation for the treatment of recurrent *Clostridium difficile* infection and has completed over 100 procedures.

Dr. Louie graduated from the University of Alberta Medical School, Calgary, AB, Canada and interned at the Vancouver General Hospital. He completed internal medicine training in Calgary and at UCLA, followed by infectious diseases training at UCLA and Tufts University School of Medicine.
